

HUNTINGTONS DISEASE (HD) A brain disease genetically inherited from a parent with HD, Its symptoms include progressively disabling involuntary movements and physical features, complex challenges in thinking and mood changes. Although its onset is typically in one's middle age, its two-decade course eventually compromises the ability to earn a living, drive, care for oneself and communicate. Every member of a family touched by HD is affected: walking one's own road, caring for another and /or living at a 50:50 risk of inheriting the gene for HD.

Launched by Marjorie Guthrie in 1967, the Huntington's Disease worldwide movement toward a cure, improved care and increased public awareness has made striking advances, but care and support, in all its forms, remains primary. It's the primary reason that, as families walk their HD roads, Garbage Trail walkers walk beside them.

PROCEEDS "Massacree HD" by supporting HD families living in extreme poverty in South American countries with the highest prevalence of HD in the world. We also support cutting edge research at the labs of the UMass Medical Center to develop future treatments. Over the years we have supported summer camps for adults living with HD and newer, smaller associations' care initiatives.

THE GUTHRIE CENTER seeks to cultivate cultural preservation, promote educational achievement and foster community outreach to meet the ongoing needs of the community.

Founded in 1991 by Arlo Guthrie to honor the legacy of his parents, Woody Guthrie and Marjorie Mazia-Guthrie. The Guthrie Center offers interfaith services and spiritual exchange. Bringing individuals together for cultural, educational, and spiritual exchange, we work together with other non-profit agencies to serve those in need. In doing so we hope to create an environment where individuals can come together to cultivate a deeper awareness of culture, humanity and the environment of which we are all a part.

"Arlo Guthrie's Historic Garbage Trail" Walk To Massacree HD

Sunday, May 22, 2022

Registration
8:30/Walk 10:00am
